

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PHILOSOPHICAL
TRANSACTIONS,
OF THE
ROYAL SOCIETY
OF
LONDON.

FOR THE YEAR MDCCCVI.

PART I.

LONDON,

PRINTED BY W. BULMER AND CO. CLEVELAND-ROW, ST. JAMES'S;
AND SOLD BY G. AND W. NICOL, PALL-MALL, BOOKSELLERS TO HIS MAJESTY,
AND PRINTERS TO THE ROYAL SOCIETY.
MDCCCVI.

ADVERTISEMENT.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a Body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued, for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed, to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March, 1752. And the grounds of their choice are, and will continue to

be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.

CONTENTS.

- I. *THE Croonian Lecture on the Arrangement and mechanical Action of the Muscles of Fishes.* By Anthony Carlisle, Esq. F.R.S. F.L.S. page 1
- II. *The Bakerian Lecture on the Force of Percussion.* By William Hyde Wollaston, M.D. Sec. R. S. p. 13
- III. *Mémoire sur les Quantités imaginaires.* Par M. Buée. Communicated by William Morgan, Esq. F. R. S. p. 23
- IV. *Chemical Experiments on Guaiacum.* By Mr. William Brande. Communicated by Charles Hatchett, Esq. F.R.S. p. 89
- V. *On the Direction of the Radicle and Germen during the Vegetation of Seeds.* By Thomas Andrew Knight, Esq. F.R.S. In a Letter to the Right Hon. Sir Joseph Banks, K. B. P. R. S. p. 99
- VI. *A third Series of Experiments on an artificial Substance, which possesses the principal characteristic Properties of Tannin; with some Remarks on Coal.* By Charles Hatchett, Esq. F. R. S. p. 109
- VII. *The Application of a Method of Differences to the Species of Series whose Sums are obtained by Mr. Landen, by the Help of impossible Quantities.* By Mr. Benjamin Gompertz. Communicated by the Rev. Nevil Maskelyne, D. D. Astronomer Royal, F. R. S. p. 147

VIII. *An Account of a small Lobe of the human prostate Gland, which has not before been taken Notice of by Anatomists.* By
Everard Home, Esq. F. R. S. p. 195

IX. *On the Quantity and Velocity of the Solar Motion.* By
William Herschel, LL. D. F. R. S. p. 205

APPENDIX.

Meteorological Journal kept at the Apartments of the Royal Society, by Order of the President and Council.

ERRATA IN THE MEMOIR ON IMAGINARY QUANTITIES.

Page 26, line 23, for 3e. read	zde.
— 32, — 14, for $(1 \pm \sqrt{-1})$, read	$(1 \pm \sqrt{-1})$.
— 40, — 19, for $\sqrt{2} \times \sqrt{2}$, read	$\sqrt{2} \times \sqrt{2}$.
— 69, — 15, for $+\frac{(0 \times n \cdot 90^\circ \sqrt{-1})}{1 \cdot 2}$, read	$+\frac{(0 \times n \cdot 90^\circ \sqrt{-1})^2}{1 \cdot 2}$.
— 70, — 19, for cercle et, read	centre à.
— 76, — 18, for $\left\{ (\sin. a \sqrt{-1} \cos. a)^{\frac{1}{3}} \right\}$, read	$\left\{ (\sin. a \sqrt{-1} + \cos. a)^{\frac{1}{3}} \right\}$.
— 82, — 6, for $\pm px$, read	$\pm \sqrt{px}$.

The PRESIDENT and COUNCIL of the ROYAL SOCIETY adjudged the Medal on Sir GODFREY COPLEY's Donation for the year 1805 to HUMPHRY DAVY, Esq. F.R. S. for his various communications published in the Philosophical Transactions.

Variation of the Magnetic Needle.

1805.

June	-	-	-	-	$24^{\circ} 7', 8$ W.
Dip of the needle	-	-	-	-	$70^{\circ} 21$.

Note. Subtract $2'$ from the variation of last year, for the error of the instrument.
